The information is encrypted using the standard RSA Public/Private key methodology. For security reasons, we do not copy the private key onto the client machine; instead it resides on our servers and thus the need for an Internet connection to obtain a code to complete the install of the software.

Our installation does not scan your hard drive or gather any personal information from your computer; therefore, no privacy issues should be of concern to you. Customers are still encouraged to register the product using the traditional and voluntary web site registration form.

The installation process should be simple and unobtrusive for all customers. Our goal is to prevent installation of serial numbers that have been obtained from fraudulent purchases, returned products, expired programs and other suspicious means.

Chart FX for .NET License Agreement

READ CAREFULLY BEFORE INSTALLING THE SOFTWARE.

By installing the Chart FX for .NET software (hereinafter "the Software" or "Software"), you are accepting the following License Agreement.

LICENSE AGREEMENT. This is a legal agreement between you (either an individual or an entity) and Software FX, Inc. By installing the software you are agreeing to be bound by the terms of this agreement. If you do not agree to the terms of this agreement, promptly return the uninstalled software to the place you purchased it for a full refund.

1. GRANT OF LICENSE. Software FX, Inc. grants to you as an individual or entity a non-exclusive license to make and use copies of the SOFTWARE in the manner provided below. The rights granted under this Agreement are only effective upon payment of license fees and possession of the appropriate License Agreement (if applicable). The software is licensed, not sold.

- (a) Installation. The software contains portions known as "Design-time Components" that provide development facilities in Visual Studio .NET and other development environments. Also, "Production Server Components" are provided to enable services on a computer called a server, and finally "Redistributable Code" allows client computers or workstations to access or utilize the services provided by the software. This license agreement grants you one (1) license of the software portions known as "Design-time" and "Production Server" components. You may use the "Redistributable Code" portions on any computer or workstation subject to the Distribution Requirements described in Section 4.

- (b) Use of Design-time Components. The "Design-time Components" are licensed on a per seat basis. Per-seat licenses are licenses that are counted by all the machines on which any "Designer Component" will reside on. To use a per-seat license, every machine installing, running and/or using the software for development purposes must have a licensed copy and its appropriate license. A development seat license is required for each additional computer on which you will be installing and running any of the "Design-time Components". "Design-time Components" are accompanied by a server portion labeled and licensed as a "Test/Development Server", you may use the "Test/Development Server" software for the sole purpose of designing, developing and testing your product(s). "Test/Development Server Components" have been designed to operate in conjunction with the "Design-Time Components" and must not be used as a separate component.

- (c) Use of Production Server Components. The "Production Server Components" are licensed on a per server basis. The "Production Server Components" may only be used on one and the same server. Additional license fees are also due if the "Production Server Components" are used for hosting or service bureau purposes (e.g. an Internet Service Provider (ISP) may not use the "Production Server Components" when hosting pages for its customers using different domain names). A Production Server license is required for each additional computer on which you will be installing and running any of the "Production Server Components"
